

9/9/08

Thank you for your interest in J-wheelz! I enjoyed the opportunity to have personal conversations with many of you at DakotaFest and the State Fair, and I appreciate your input for our new product.

As promised, here is an update on our progress over the last few weeks.

We spent most of last week running our production samples through a series of durability tests ranging from driving them through pastures and creeks to impact-testing them with sledgehammers! If you would like to see video of our durability testing please follow this link: <http://www.youtube.com/watch?v=ZHyCXUFRrfU>

In addition to the durability testing, we have incorporated some of the design suggestions we received from folks like you at our exhibits. We are strengthening and increasing protection for the floatation insert, especially around the bungee cord, to ensure everything stays in place regardless of the terrain. We are also pushing forward with designs for more aggressive and taller blades.

Some of these changes have pushed back our production schedule a few weeks, but the changes will help ensure that we provide a quality and dependable product.

We will update our web page soon with new pictures, video and information and will also send out occasional newsletters like this one to keep you up-to-date on our progress.

If you have specific questions, or if you would like to be removed from this list, please feel free to use the Contact Us page on our website ([http://www.j-wheelz.com/contact\\_us.html](http://www.j-wheelz.com/contact_us.html)), or call our office at (605) 692-1590.

Regards,  
**J-wheelz**
